Key Technologies

-196℃

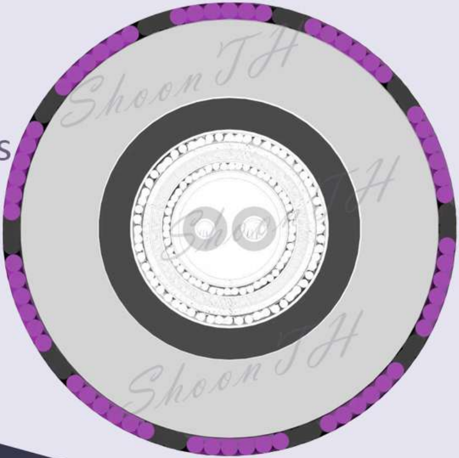
×2

Silica

Single Crystal Silver

The core is wrapped in a large aperture PTFE insulation on the outside, which is resistant to high temperatures and reduces the distortion of electron bounce.

Accurate RCA has powerful HiFi performance.



Shoon TH

The double shielding forms can absorb external vibration effectively, and isolate the external vibration conducted to the core, so as to reduce the distortion of music details.

Double Shielding Forms

Silicone Shockproof Sleeve

ShoonTH
ShoonTH

ShoonTH originally use silicone shock-proof sleeve. This process method can make the whole cable softer, and more resistant to high temperature and high pressure. It can greatly absorb vibration and reduce vibration transmission. Relatively speaking, the insulation coefficient is better.

Absorbing Brackets

Accurate RCA Cable uses absorbing brackets.

This technology can effectively isolate the high-frequency electromagnetic interference, and reduce the distortion caused by external vibration on core conduction.

Invention patents number: 201811287781.1

Absorbing Rings

The wire equipped with absorbing ring technology. It can make the music background more quiet and dark. The horizontal width and vertical depth of the sound stage clearer and more accurate.

-196℃ Three-Stage Low-Temperature Freezing Treatment

Invention patents number: 202110279086.6

The whole cable and plugs are processed by three stages Cryo-treatment at -196℃.

This method can effectively improve the metal grain gap and structure, and greatly improve the probablity of electron scattering, thereby improving electrical conductivity.

Frequency Division Conduction

Low-frequency
High-frequency

Accurate RCA Cable adopts double channel frequency division conduction. The calculated diameter is applicable to the high-frequency core, which is processed independently from the low-frequency core. This technology will make the whole frequency band sound more balanced, and reduce the peaks and valleys of the frequency band curve.

- Cotton Yarn Fiber Sleeve -

The cotton yarn fiber shockproof sleeve and silicone tube can greatly absorb vibration and reduce vibration transmission.

SHOONTH

Company Profile

ShoonTH Technology Co., Ltd. develops, designs and produces high-fidelity audio cables, with a new concept. We have an excellent R&D team with members whom over the past 10 years have produced several patented technologies. ShoonTH products employ the latest technologies and are built with the highest standards.

ShoonTH is committed to becoming a leading high-fidelity cable brand, originating from China.
