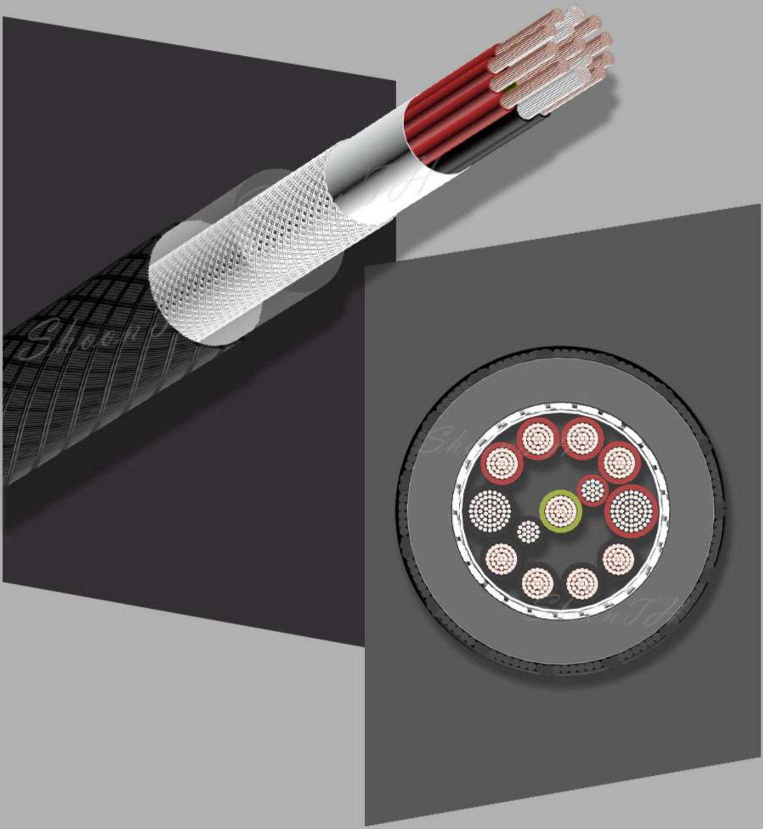
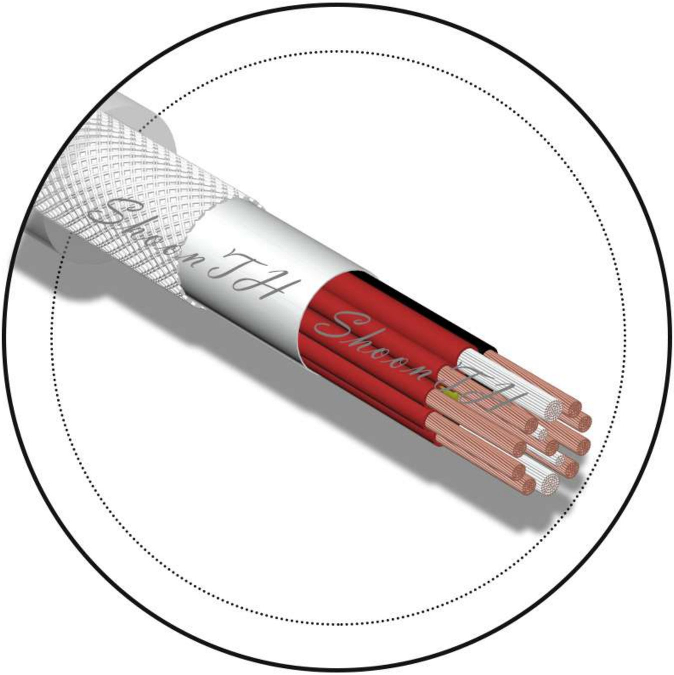
OCC+ Silver Plated OCC



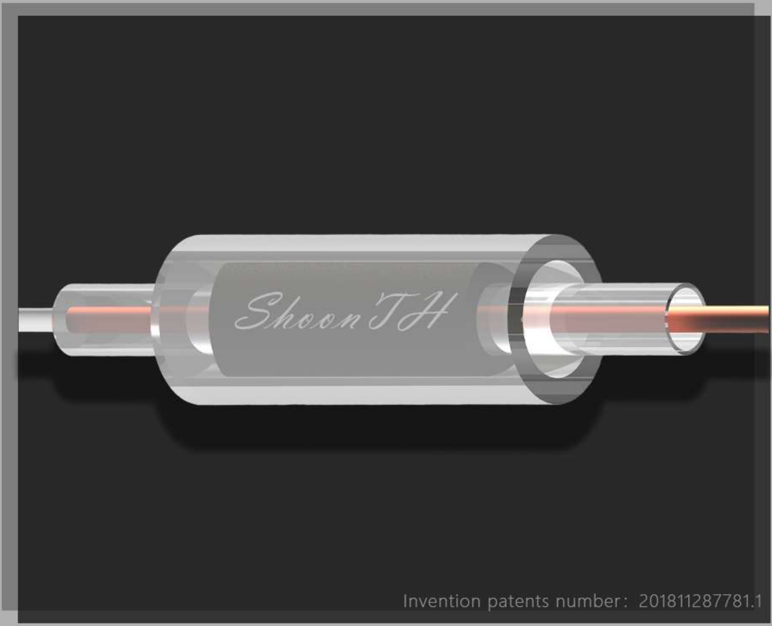
Multi-Channel Matching



The Exploring Pro Power Cable matches musical signals through different channels.

They can be calculated according to the required design, and then processed by special preparation methods.

Double Absorbing Rings



Invention patents number：201811287781.1

The Exploring Pro Power Cable uses double absorbing rings.

This technology can make the music background more quiet and dark. The horizontal width and vertical depth of the sound stage clearer and more accurate

-196℃ Three-Stage

Low-Temperature Freezing Treatment

ShoonTH
Exploring
Invention patents number： 202110279086.6

The whole cable and plugs are processed by three stages Cryo-treatment at -196℃.

This method can effectively improve the

metal grain gap and structure, and greatly improve the probablity of electron scattering, thereby improving electrical conductivity.

Encrypted Shielding

Oxygen-free copper shielding mesh and

4N double-layer encrypted oxygen-free copper shielding mesh with single-point ground form.

Silicone Shockproof Sleeve

ShoonTH originally use silicone shockproof sleeve.

This process method can make the whole

cable softer, and more resistant to high temperature and high pressure.
It can greatly absorb vibration and reduce vibration transmission. Relatively speaking, the insulation coefficient is better.

Cotton Yarn Fiber Sleeve

The cotton yarn fiber shockproof sleeve and silicone tube can greatly absorb vibration and reduce vibration transmission.

SHOONTH

Company Profile

ShoonTH Technology Co., Ltd. develops, designs and produces high-fidelity audio cables, with a new concept. We have an excellent R&D team with members whom over the past 10 years have produced several patented technologies. ShoonTH products employ the latest technologies and are built with the highest standards.

ShoonTH is committed to becoming a leading high-fidelity cable brand, originating from China.
