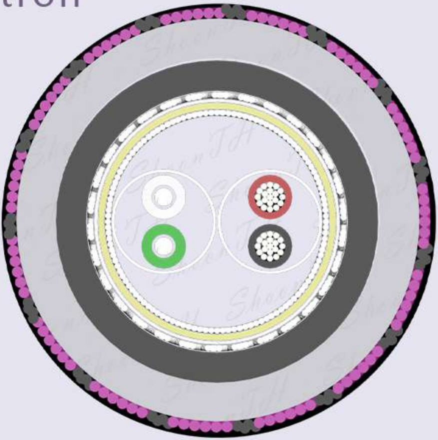
Shoon JH

## Single Crystal Silver

The core is wrapped in a large aperture PTFE insulation on the outside, which is resistant to high temperatures and reduces the distortion of electron bounce.

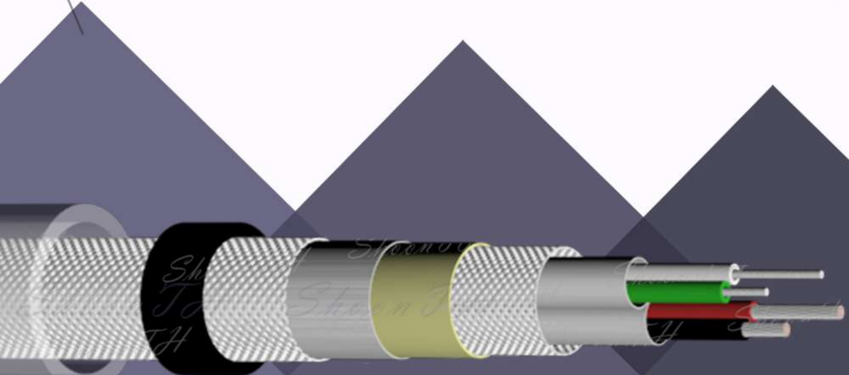
Accurate -
USB Cable HiFi performance is powerful.



The double shielding forms can absorb external vibration effectively, and isolate the external vibration conducted to the core, so as to reduce the distortion of music details.

## Double Shielding Forms

## Silicone Shockproof Sleeve

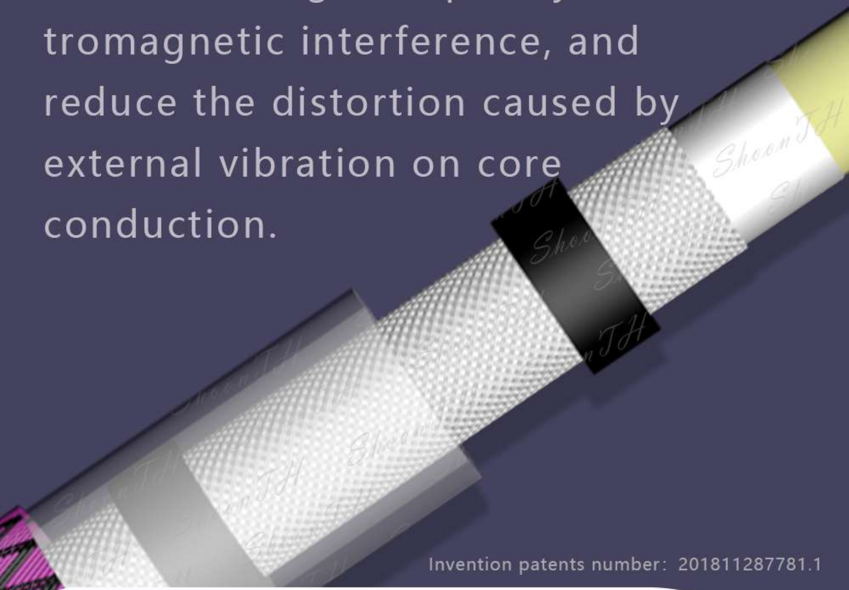


ShoonTH originally use silicone shock-proof sleeve. This process method can make the whole cable softer, and more resistant to high temperature and high pressure. It can greatly absorb vibration and reduce vibration transmission. Relatively speaking, the insulation coefficient is better.

## Double Absorbing Brackets

Accurate USB Cable uses double absorbing brackets.

This technology can effectively isolate the high-frequency electromagnetic interference, and reduce the distortion caused by external vibration on core conduction.



Invention patents number: 201811287781.1

## Absorbing Rings

The wire equipped with absorbing ring technology. It can make the music background more quiet and dark. The horizontal width and vertical depth of the sound stage clearer and more accurate.

# -196℃ Three-Stage Low-Temperature Freezing Treatment

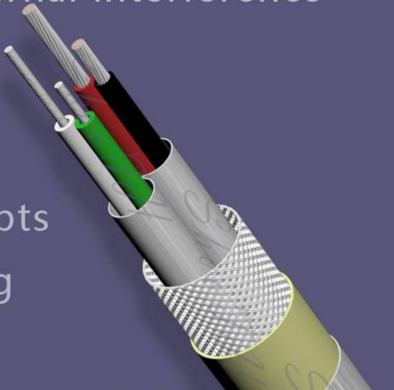
Invention patents number: 202110279086.6

The whole cable and plugs are processed by three-stage low temperature freezing treatment at -196℃.

This method can effectively improve the metal grain gap and structure, and greatly improve the probablity of the electron scattering, thereby improving electrical conductivity.

## Independent Shielding of Power and Signal

Independent shielding and single electric grounding can effectively isolate and eliminate the internal interference of wire rod.



The external of the overall wire base adopts multi-point grounding protection, which can eliminate the digital transmission error caused by external interference entering the wire base, so as to greatly improve the data transmission speed.

## - Cotton Yarn Fiber Sleeve -

The cotton yarn fiber shockproof sleeve and silicone tube can greatly absorb vibration and reduce vibration transmission.

SHOONTH

# Company Profile

ShoonTH Technology Co., Ltd. develops, designs and produces high-fidelity audio cables, with a new concept. We have an excellent R&D team with members whom over the past 10 years have produced several patented technologies. ShoonTH products employ the latest technologies and are built with the highest standards.

ShoonTH is committed to becoming a leading high-fidelity cable brand, originating from China.
