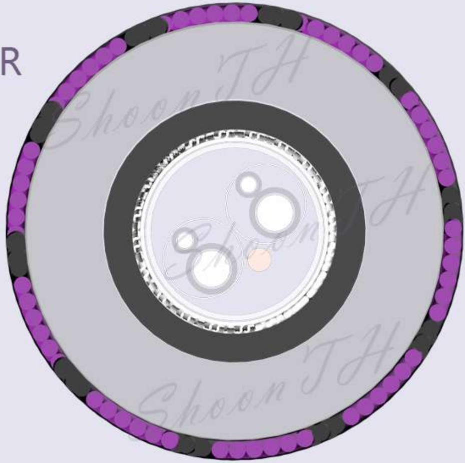
Single Crystal Silver

The core is wrapped in a large aperture PTFE insulation on the outside, which is resistant to high temperatures and reduces the distortion of electronbounce.

Accurate Pro XLR adopts reinforced core as high and low frequency.



The double shielding forms can absorb external vibration effectively, and isolate the external vibration conducted to the core, so as to reduce the distortion of music details.

ShoonTH

Double Shielding Forms

Silicone Shockproof Sleeve

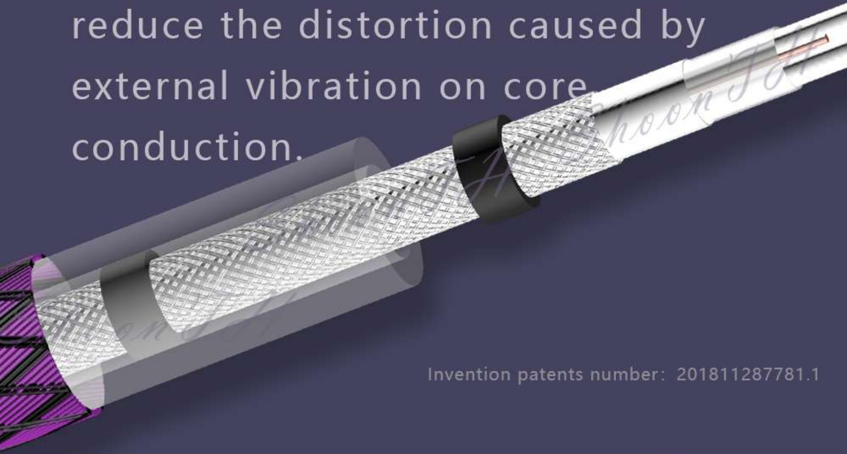
Shoon TH

ShoonTH originally use silicone shockproof sleeve. This process method can make the whole cable softer, and more resistant to high temperature and high pressure. It can greatly absorb vibration and reduce vibration transmission. Relatively speaking, the insulation coefficient is better.

Strengthen Absorbing Brackets

Accurate pro XLR Cable uses strengthen wave-absorbing brackets.

This technology can effectively isolate the high-frequency electromagnetic interference, and reduce the distortion caused by external vibration on core conduction.



Invention patents number: 201811287781.1

Strengthen Absorbing Rings

The wire equipped with strengthen wave-absorbing ring technology. This technology can make the music background more quiet and dark. The horizontal width and vertical depth of the sound stage

-196℃ Three-Stage Low-Temperature Freezing Treatment

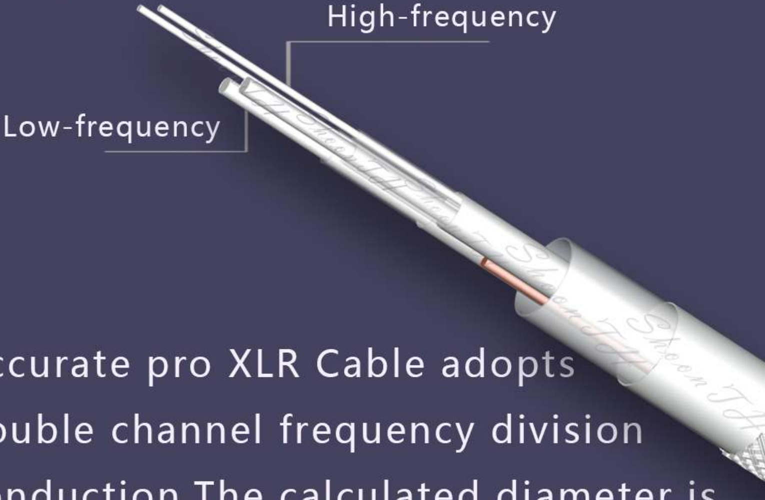
Accurate
pro

Invention patents number：202110279086.6

The whole cable and plugs are processed by three stages Cryo-treatment at -196℃.

This method can effectively improve the metal grain gap and structure, and greatly improve the probablity of electron scattering, thereby improvingg electrical conductivity.

Frequency Division Conduction



Accurate pro XLR Cable adopts double channel frequency division conduction.The calculated diameter is applicable to the high-frequency core, which is processed independently from the low-frequency core. This technology will make the whole frequency band sound more balanced, and reduce the peaks and valleys of the frequency band curve.

- Cotton Yarn Fiber Sleeve -

The cotton yarn fiber shockproof sleeve and silicone tube can greatly absorb vibration and reduce vibration transmission.

Rhodium Plug with Four-Layer Plating

- Air Insulation -

The air insulation can reduce the contact area between the conductor and Teflon insulator, so as to reduce the capacitance effect caused by the absorption and instantaneouvs release of electrons by the insulator, and reduce the distortion of music signal transmission.

SHOONTH

Company Profile

ShoonTH Technology Co., Ltd. develops, designs and produces high-fidelity audio cables, with a new concept. We have an excellent R&D team with members whom over the past 10 years have produced several patented technologies. ShoonTH products employ the latest technologies and are built with the highest standards.

ShoonTH is committed to becoming a leading high-fidelity cable brand, originating from China.
